Profile

Statistics undergraduate with a strong interest in Data Science, Robotics, and Computer Vision. Currently a member of the Autonomous Systems Group at METU Formula Racing, focusing on perception tasks. Experienced in Python, R, OpenCV, and YOLO, with growing expertise in Sensor Fusion, LIDAR, and RADAR technologies. Passionate about solving real-world problems through data-driven approaches.

Education

Middle East Technical University (METU) 2023 – Present
Bachelor of Science in Statistics

Work Experience

Baykar Teknoloji – AI Software Engineer Intern Jul 2025 – Sep 2025

- Contributed to research and development projects in the field of autonomous systems and artificial intelligence.
- Assisted in the development and evaluation of algorithms related to robotics and computer vision.
- Collaborated with a multidisciplinary team to analyze data and support ongoing projects.

C4IR Azerbaijan – AI Engineer Intern May 2025 – Aug 2025

- Participated in AI Engineering internship focused on solving real-world problems through machine learning and time series forecasting.
- Developed and evaluated time series models (ARIMA, Prophet) for short- and long-term forecasting tasks.
- Implemented backtesting frameworks and statistical diagnostics to validate model performance.

METU Formula Racing – Autonomous Systems Team Member Feb 2025 – Present

- Worked in the Perception team, focusing on traffic sign detection using YOLOv8.
- Developed computer vision algorithms for real-time object detection and classification.
- Processed sensor data and integrated multiple sources using ROS.
- Contributed to Sensor Fusion, incorporating LIDAR and RADAR data for improved perception.

Personal Data Science & ML Projects

- Conducted data analysis and visualization using Seaborn and Matplotlib.
- Built object detection and classification models with OpenCV.
- Developed machine learning models utilizing statistical methods.

Skills

Programming Languages: Python, R, Java, SQL, Matlab ,C++

ML & Data Science: OpenCV, YOLOv8, Seaborn, Pandas, Matplotlib

Autonomous Systems: ROS, Sensor Fusion, Computer Vision

Other: Problem-solving, Teamwork, Critical Thinking, Research

Languages

Azerbaijani (Native), Turkish (Native), Russian (Intermediate), English (Professional)

Interests

Fitness, Films (Letterboxd logging), Podcasts, Football (Beşiktaş & Neftçi fan)
