PROFILE INFO

I am a Statistics student with a strong interest in Data Science, Machine Learning, and Computer Vision. I am currently a member of the Autonomous Group at METU Formula Racing, where I focus on Perception tasks. I have experience with Python, R, OpenCV, Seaborn, YOLO and I plan to expand my expertise in Sensor Fusion, LIDAR, and RADAR technologies. I am passionate about solving real-world problems using data-driven approaches.

EDUCATION

MIDDLE EAST TECHNICAL UNIVERSITY (METU)

- Bachelor of Statistics(2023-Present)

SKILLS

- Programming Languages:** Python, R, Java, SQL, Matlab.
- Machine Learning & Data Science:** OpenCV, YOLOv8, Seaborn, Pandas, Matplotlib.
- Autonomous Systems & Robotics:** ROS, Sensor Fusion, Computer Vision
- Other Skills:** Problem-solving, Teamwork, Critical Thinking, Research

LANGUAGES

- Azerbaijani (Native proficiency)
- Turkish (Native proficiency)
- Russian (Intermediate proficiency)
- English (Professional proficiency)

WORK EXPERIENCE

METU Formula Racing

Autonomous Systems Team Member

2025-PRESENT

- Working in the Perception team, focusing on traffic sign detection using YOLOv8.
- Developing computer vision algorithms for real-time object detection and classification.
- Processing sensor data and integrating multiple sources using ROS (Robot Operating System).
- Currently working on Sensor Fusion, incorporating LIDAR and RADAR data for improved perception.
- Contributing to the development of the autonomous system for METU's self-driving Formula Student vehicle.

C4iR Azerbaijan

2025-PRESENT

AI Engineer

- Participating in AI Engineering internship focused on solving real-world problems through machine learning and time series forecasting
- Developed and evaluated time series models (ARIMA, Prophet) for short- and long-term forecasting tasks
- Implemented backtesting frameworks and statistical diagnostics to validate model performance and reliability
- Expanding knowledge in core AI topics such as model evaluation, deployment strategies, and pipeline automation

Personal Data Science & ML Projects

- Data Visualization:** Conducted data analysis using Seaborn and Matplotlib.
- Computer Vision:** Built object detection and classification models with OpenCV.
- Predictive Modeling:** Developed machine learning models utilizing statistical methods.

INTERESTS

- Fitness**
- Film** (Watching films and logging them to my Letterboxd account)
- Podcasts**
- Football** (Beşiktaş and Neftçi fan)
